Six emerging generative AI user interfaces

The Chatbot

No introduction required. The classic chatbot interface.

Examples

ChatGPT

Claude

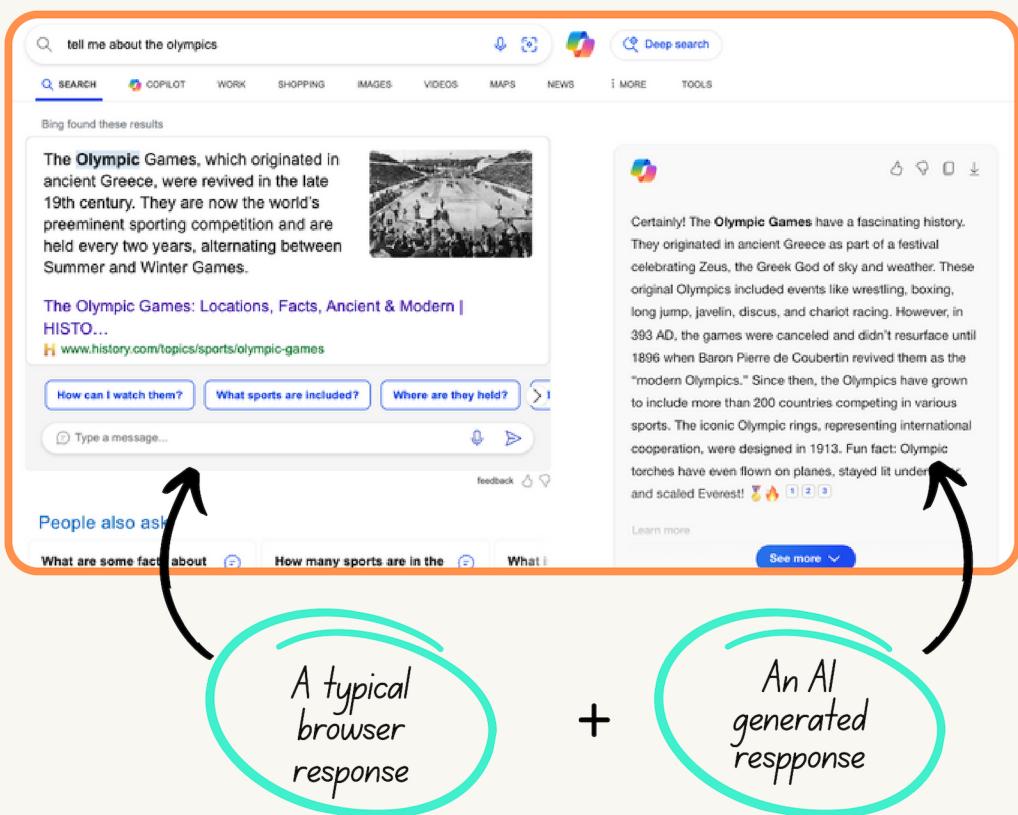

Perplexity

insurgence

The Augmented Browser

A search engine with embedded AI responses

Examples

Google

Arc

Bing

The AI Workspace

An AI powered, multi-feature interface.

The screenshot displays the Devin's Workspace interface. On the left, a 'Chat interface' shows a conversation between Devin and Scott. Devin is currently debugging a script. In the center, a 'Code terminal' window shows a command-line session with a Python error. On the right, a 'Web terminal' window shows a browser tab for 'https://docs.togetherai/reference/chat-completions'. Blue arrows point from three callout bubbles to these specific sections: 'Chat interface' points to the chat window, 'Code terminal' points to the terminal window, and 'Web terminal' points to the browser tab in the web terminal window.
